GEODERMA

Contents Volume 70, 1996

Research Papers

Application of fuzzy logic to land suitability for rubber production in peninsular Thailand
E. Van Ranst, H. Tang, R. Groenemans and S. Sinthurahat 1

Late Quaternary, redeposited loess–soil developmental sequences, South Yemen
W.D. Nettleton and O.A. Chadwick 21

The influence of pocket gophers on the status of nutrients in Alpine soils
M.I. Litaor, R. Mancinelli and J.C. Halfpenny 37

Transformations of 2:1 phyllosilicates in 41-year-old soils under oak and pine
K.R. Tice, R.C. Graham and H.B. Wood 49

Soil properties under Amazon forest and changes due to pasture installation in Rondônia, Brazil
J.F.L. de Moraes, B. Volkoff, C.C. Cerri and M. Bernoux 63

SPECIAL ISSUE

FINGERED FLOW IN UNSATURATED SOIL: FROM NATURE TO MODEL

T.S. Steenhuis, C.J. Ritsema and L.W. Dekker (Editors)

Introduction 85

Uneven moisture patterns in water repellent soils
L.W. Dekker and C.J. Ritsema 87

Three-dimensional visualization of preferential flow patterns in two soils
A.W.J. Heijs, C.J. Ritsema and L.W. Dekker 101

Using ground-penetrating radar to detect layers in a sandy field soil
J. Boll, R.P.G. van Rijn, K.W. Weiler, J.A. Ewen, J. Daliparthy, S.J. Herbert and T.S. Steenhuis . . 117

Physics of gravity fingering of immiscible fluids within porous media: An overview of current understanding and selected complicating factors
R.J. Glass and M.J. Nicholl 133

Lateral solute mixing processes — A key for understanding field-scale transport of water and solutes
H. Flühler, W. Durner and M. Flury 165

Predicted and observed finger diameters in field soils
C.J. Ritsema, T.S. Steenhuis, J.-Y. Parlange and L.W. Dekker 185

An engineering approach to fingered vadose pollutant transport
J.S. Selker, T.S. Steenhuis and J.-Y. Parlange 197

Modeling finger development and persistence in initially dry porous media
J.L. Nieber 207

Simulation of gravity fingering in porous media using a modified invasion percolation model
R.J. Glass and L. Yarrington 231

Solute leaching in a sandy soil with a water-repellent surface layer: A simulation
G.H. de Rooij and P. de Vries 253

Prediction of wetting front stability in dry field soils using soil and precipitation data
J.M.H. Hendrickx and T.-m. Yao 265
Multi-domain model for pore-size dependent transport of solutes in soils
W. Durner and H. Flühler 281
A stochastic approach to simulate water flow in a macroporous soil
D. Mallants, D. Jacques, M. Vanclooster, J. Diels and J. Feyen 299
